RAINWEAR

RAINWEAR
2018

DEAR CUSTOMER,

It is with great pleasure that we present our new 2018 catalogue.

The catalogue contains our full range of rainwear which offers a wider selection of garments than ever before – including several exciting new products. We have solutions not only for the workplace but also for the private user too.

Our entire range is designed by ourselves with today's user in mind and thoroughly tested in some of the leading test houses in Europe, as well as through our own internal quality control systems. This ensures that the delivered garments are always of the highest quality and can withstand the demands for clothing where the user is exposed to nature's extreme conditions.

We have the highest expectations of not only our subcontractors but also our suppliers of materials and components – we therefore use the highest quality reflective tape from Sto-Nor/Loxy and 3M. In addition, all our suppliers are certified to BSCI.

We are very proud to be one of Europe's largest manufacturers of rainwear, and through our strong commitment to stockholding in our 8000 m² warehouse in Herning Denmark, we ensure fast delivery to our customers both within Europe and across the globe.

Our technical sales team are readily available to support our customers and users at all times and should you need help in understanding or specifying a garment and selecting the right product for your requirements, we will be only too pleased to help you.

We look forward to being your preferred supplier of rainwear and thank you for taking the time to look at our new catalogue.

PU ALLROUND

Our PU Allround range offers a wide selection of garments, with solutions not only for the workplace but also for the private user.

PU material is soft but strong and retains its elasticity even at low temperatures. The material is 100% waterproof and any build-up of condensation inside the garment is quickly dissipated by the unique knitted backing of the fabric.

AGRICULTURE

We know that the weather can sometimes be a challenge in agriculture.

Therefore, our range in this section is broad, because we know the requirements can vary widely. Most important of all is that the user is kept dry and warm and can continue to work despite the weather. Several of the products in this range have added PVC, meaning the rainwear is extra strong and durable.

LR1841

Material 50% Polyester, 25% Polyurethane, 25% PVC, 350 g/m²
Technical Waterproof: 13.000 mm

CLEANING & CHEMICALS

When working in this industry, we know how important it is for the user to be both dry and safe in many varied environments. Work often involves chemicals, soaps and other more powerful liquids that the user must be protected against. Similarly, liquids and spray can affect the user from all angles so all round protection is very important.

- With reflective tape
- Wind and waterproof

Customers sometimes need to add extra visibility to their garments. We can apply additional reflective tape and this process does not affect the waterproof benefits of the garment.

We also have the option of attaching ID pockets if required. You decide on the position and the ID pocket will be welded to the garment. This process does not affect the waterproof benefits of the garment.

MICROFLEX: 170 g/m² – 350 g/m² Polyurethane (PU)

- MICROFLEX** ensures your personal comfort and your protection from snow, wind and rain.
- MICROFLEX** is 100% waterproof coupled with a degree of air permeability, any build up of condensation inside the garment is quickly dissipated by the unique knitted backing of the fabric. All garment seams are sealed by High Frequency welding to ensure no water penetration.
- MICROFLEX** is virtually noiseless in action and its built in stretch factor enables the garment to move with every demand of the user.
- MICROFLEX** is soft yet tough, its high-tech strength and performance ensure smooth action even in low temperatures.
- MICROFLEX** is oil resistant and is impregnated with a powerful deodorant to fight off any body odour build up or fungi growth in the fabric.
- MICROFLEX** makes super lightweight garments that fold away compact and take up minimum space in your luggage.
- MICROFLEX** retains its high-tech performance through repeated washes.

EN 343

This standard specifies PPE Clothing used for working in rain or snow, fog and ground humidity. The garment and seams are tested for water penetration (waterproofness) which gives a class 1, 2 or 3 and water vapor resistance (breathability) which also gives a class 1, 2 or 3, where class 3 is the highest level in both cases. The garment must achieve a result on both tests to be CE marked with this symbol.

EN ISO 20471

This standard specifies the requirements for high visibility. The combination of fluorescent material with reflective tape should provide the visibility of the user in all lighting conditions, both in daylight and under the illumination of headlights in the dark. The number next to the pictogram indicates which class is related to the surface of both fluorescent and reflective material. The classification goes from 1-3, where 3 is the highest. This standard replaces EN 471.

EN 13034

This standard provides limited protection against liquid chemicals. Where the risk of a potential exposure to a light spray, liquid aerosols or low pressure, low volume splashes against which a complete liquid permeation barrier is not required. The standard tests four different chemicals, at least two out of four chemicals must be tested to certify and CE mark the garments with this symbol.

Chemicals that can be tested in accordance to EN 13034:
H₂SO₄ 30% (Sulphuric acid)
NaOH 10% (Sodium hydroxide)
O-xylene
Butanol

WWW.LYNGSØE-RAINWEAR.DK

LOXY®LITE REFLECTIVE MATERIAL:

The **Loxy®Lite** tape, manufactured by Sto-Nor, enhances the night-time visibility of the wearer and helps to prevent accidents. **Loxy®Lite** tape can be used on High-Visibility and safety clothing, uniforms, clothing and accessories. The **Loxy®Lite** tape composition is based on high index retro-reflective micro glass beads and is fully compliant with EN ISO 20471 and Öko-Tex 100.
